

## Labelstar Office Version 7 - Available from April 2021

### What is new and has changed?

The new version 7 of the software for designing and printing labels for Carl Valentin printers contains many new functions, performance optimizations and a whole host of improvements.

#### Label designer . Supports \*.pdf files

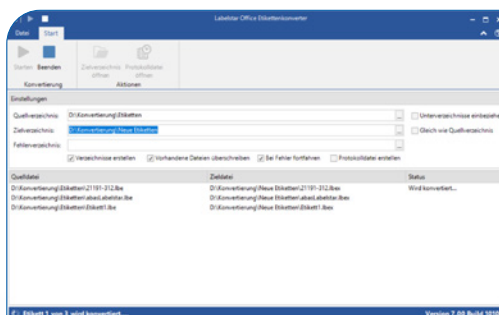

From Labelstar Office Version 7 upwards, \*.pdf files can now also be integrated as graphics on the label.

#### Database access expanded

Access to the following new data sources is integrated into Labelstar Office Version 7:

- > MySQL
- > SQLite
- > PostgreSQL
- > Oracle®

#### Label converter

Now you can easily convert Labelstar Plus labels into Labelstar Office labels using batch processing.

You can reinstall Labelstar Office or upgrade from a previous version to version 7. Please note that you need new licence numbers for Labelstar Office version 7. From Labelstar Office Version 7 upwards, CDs will no longer be sent. Your licence number will be stated on the invoice.

You can download the current version at [labelstar.carl-valentin.de](http://labelstar.carl-valentin.de)
